

### Atos unveils Scaler Cohort for Agentic AI to Anchor its Sovereign Agentic Studios

As part of the launch of the Atos Sovereign Agentic Studios, Atos introduces a new cohort to its accelerator Scaler, a tightly curated ecosystem of trusted startups selected to strengthen enterprise-grade, sovereign and production-ready Agentic AI deployments.

#### Why Agentic AI needs an ecosystem approach?

As part of its globally followed “2026 Predictions for AI Technology”, leading analyst firm Forrester Inc. predicts that organizations will increasingly need to look for a “single provider to serve as your agentic ecosystem hub” to navigate an increasingly fragmented agentic technology landscape. Forrester notes that rapid advances in agentic tool spanning coding, infrastructure integration and deployment automation—are proliferating at extreme speed, while enterprises struggle to consolidate on a single technology stack.

#### Turning fragmentation into an enterprise-ready ecosystem

Scaler is Atos’ response to this challenge. It combines technology and business expertise to help organizations move from fragmented experimentation to structured, enterprise-grade Agentic AI adoption. By integrating carefully selected technology partners, Scaler de-risks innovation while accelerating adoption, positioning Atos as a trusted, end-to-end ecosystem orchestrator, bringing structure, sovereignty and coherence to Agentic AI deployments.

#### A curated ecosystem, built for enterprise deployment

Scaler for Agentic AI brings together six high-impact startups that have been rigorously assessed against Atos’ Trust, Compliance and Data Protection validation framework. Each partner is evaluated across technological excellence, security posture and compliance readiness and data-protection standards before being integrated into the Sovereign Agentic Studios, ensuring suitability for regulated and sovereign environments

The inaugural Scaler partners in the Agentic AI cohort are **KYP.ai**, **EMA**, **Pay-i**, **Klarity**, **Poolside** and **Noma Security**. Together, they complement Atos’ industrial capabilities and strengthen the Sovereign Agentic Studios with specialized expertise across the agentic lifecycle.

#### Tested, secured and industrialized — with Atos as Client Zero

Innovation within Scaler is not theoretical. Following onboarding, partner solutions are tested, integrated, secured and validated within Atos’ own Sovereign Agentic Studios, with Atos acting as Client Zero. This approach ensures that Scaler solutions are production-ready before being deployed with customers, while also accelerating Atos’ own AI transformation.

Multiple internal and customer proofs of concept are already underway, reinforcing the practical, execution-driven nature of the Scaler model.

## A Complementary ecosystem, covering the Agentic AI Value Chain

Collectively, the six Scaler partners cover the entire Agentic AI lifecycle reflected in Atos Sovereign Agentic Studio's model from process discovery to agent design, sovereign execution, financial governance and security:

Process intelligence and task mining – to identify where agentic automation creates the strongest business impact.

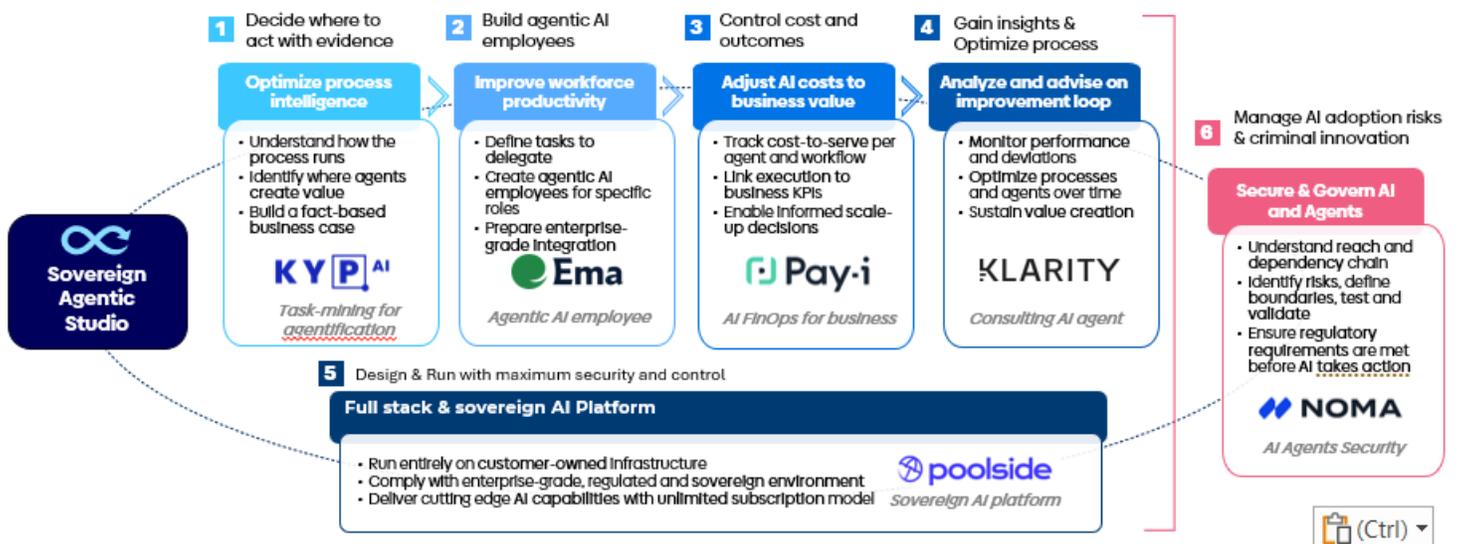

- Task-to-agent design and delegation modeling – to define which activities can be safely and efficiently delegated to AI agents.
- Agent creation and execution – to enable secure and scalable AI agents to run enterprise workflows.
- Sovereign AI infrastructure – to ensure customer-owned, controlled and compliant environments for agent execution.
- AI FinOps and performance measurement – to track cost-to-serve, KPIs, adoption and continuous value realization.
- AI risk, security and governance – to provide oversight across dependencies, compliance, action safety and operational risks.

This end-to-end coverage allows Atos to orchestrate best-of-breed innovation while preserving architectural coherence, sovereignty and freedom of choice for customers.

## Strengthening the Atos Sovereign Agentic Studio

Scaler for Agentic AI reinforces Atos' ambition to deliver one of the industry's safest, most sovereign and most enterprise-ready Agentic AI ecosystems. Embedded within the Atos Sovereign Agentic Studios, Scaler enables organizations to deploy autonomous AI agents with measurable business value and full operational control, even in the most demanding environments.

Together, the Sovereign Agentic Studio and the Scaler ecosystem combine startup innovation with Atos' industrial discipline — turning Agentic AI from promise into production-ready reality.

## **Meet the Six Scaler Startups**

### **About KYP.ai**

KYP.ai is a process intelligence platform built on three pillars: a 360° View capturing real-time data across enterprise workforce, processes, and technology; a Business Transformation Engine that quantifies inefficiencies and calculates automation ROI; and an Agentic AI Enabler that generates ready-to-execute agent code with structured business context. Deployed at Fortune 1000 enterprises globally, KYP.ai is recognized by Everest Group, Forrester, and Gartner as a leader in process intelligence.

### **About Pay-i**

Pay-i is the backbone of the AI-first enterprise. The platform provides GenAI financial governance and ROI measurement, giving organizations real-time visibility into the cost, performance, and business value of every AI model, agent, and workflow in production. Pay-i ensures that every AI investment is measurable, accountable, and aligned to business outcomes. Through the Scaler program, Pay-i and Atos are partnering to embed financial governance directly into the Sovereign Agentic Studio, giving customers the foundation they need to scale agentic AI with confidence and control.

### **About Ema**

Ema is a horizontal agentic platform for building enterprise AI employees. Designed with enterprise-grade security and deep system integrations, Ema enables organizations to automate complex, multi-step business processes while maintaining human oversight and governance. Powered by EmaFusion™, Ema agents can reason, communicate, and take actions across enterprise systems, leveraging 200+ pre-built integrations and company knowledge - while remaining simple to use through an intuitive no-code UX.

### **About NOMA Security**

Noma is the leading AI security platform for the enterprise, purpose-built to secure every type of AI and agent across the organization, from homegrown agents and applications to SaaS agent platforms like Microsoft Copilot Studio and Salesforce AgentForce, to coding assistants and MCP servers. Noma delivers full discovery and governance across the AI environment, AI red teaming to harden the agentic security posture, and runtime protection that enforces guardrails against prompt injection, data exfiltration, and policy violations. AWS selected Noma as their AI security platform for their Security Hub, and Microsoft and Databricks are strategic partners. Trusted by Fortune 500 companies and backed by \$130M+ in funding, Noma is the established market leader in AI security.

### **About Poolside**

Poolside is a frontier AI lab building toward Artificial General Intelligence by mastering software as the foundation of reasoning. We develop powerful models and the enterprise-grade products that make them usable in production. Our autonomous agents operate securely, observably, and within defined guardrails—enabling governments and enterprises to deploy increasingly capable AI with control and trust.

### **About Klarity**

Klarity AI captures real-time intelligence to help companies spot inefficiencies and deliver actionable insights. It's the organizational layer that helps enterprises continuously understand how they operate, adapt with agility, and drive compounding, measurable change across their entire organization.

## About Atos Group

Atos Group is a global leader in digital transformation with c. 63,000 employees and annual revenue of c. €8 billion, operating in 61 countries under two brands — Atos for services and Eviden for products. European number one in cybersecurity, cloud and high performance computing, Atos Group is committed to a secure and decarbonized future and provides tailored AI-powered, end-to-end solutions for all industries. Atos Group is the brand under which Atos SE (Societas Europaea) operates. Atos SE is listed on Euronext Paris.

The [purpose of Atos Group](#) is to help design the future of the information space. Its expertise and services support the development of knowledge, education and research in a multicultural approach and contribute to the development of scientific and technological excellence. Across the world, the Group enables its customers and employees, and members of societies at large to live, work and develop sustainably, in a safe and secure information space.
